

About Us

Aspirom Technologies Pvt. Ltd.

Aspirom Technologies Pvt. Ltd. is an emerging technology company and a **startup registered under the Kerala Startup Mission**, focused on building innovative digital ecosystems that empower both consumers and businesses.

The company has developed **OLOPO (Our Loyalty Points)** — a next-generation **rewards-driven Super App** designed for everyday use by individuals. OLOPO integrates shopping, rewards, digital payments, and community engagement into a single platform, creating a seamless and rewarding digital commerce experience.

OLOPO enables users to earn rewards from their everyday spending. For every **₹25 spent**, customers earn **OLOPO Loyalty Points (OLP)**, where **1 OLP is equal to ₹1 in value**, making it one of the most transparent and user-friendly reward systems in the market.

To support a secure and scalable transaction ecosystem, Aspirom Technologies works with leading financial and technology partners. The platform operates in partnership with **Pine Labs** as a **Value Added Service (VAS)** provider on Pine Labs EDC machines, enabling seamless merchant integration across physical retail outlets. Banking infrastructure and financial operations are supported by **HDFC Bank**, ensuring reliability and trust in the platform.

The platform's financial architecture is designed to follow the operational guidelines of the **Reserve Bank of India**, ensuring high standards of compliance, transaction security, and transparency.

A key component of the ecosystem is the **OLOPO Shopping Point (OSP)** system. OSP functions as a digital shopping value that can be used for purchases within the OLOPO ecosystem — both **online and offline**. All **OSP transactions are secured and operated under the guidelines of the Reserve Bank of India**, ensuring regulatory compliance and financial safety within the platform.

Customers can use OSP for their daily shopping needs across participating merchants. Additionally, **OSP kept unused for longer periods within the ecosystem may earn bonus benefits**, creating additional value for users while encouraging responsible digital commerce.

Through its technology and partnerships, Aspirom Technologies aims to build a **trusted digital commerce network that rewards everyday spending, strengthens local retail, and creates a connected community-driven economy**.

The vision of the company is to transform how people **shop, earn rewards, and engage with commerce**, making everyday transactions more valuable, transparent, and rewarding.
